**COLDWELL BANKER
DEVELOPAC REALTY**

- You may only use cardboard and tape to build your sled.
Decorations are encouraged on sides of sled but the bottom **MUST** be cardboard and tape.
- Your sled must pass inspection in order to be allowed on the hill.
- Your sled must be free of sharp edges, pointy objects, or any other feature that may be considered dangerous.
- You may not use tar based substance, epoxy glue, fiberglass, resin, or glues that harden into solids.
- You may not use screws or any sort of mechanical fasteners, nails, or staples.
- Your sled may not be wrapped in plastic, shrink wrap, or any other materials.
- One rider per sled.
(Group sled riding may be done for fun at end of derby).
- You may have one person push the sled at the start up until a point designated by cones and/or line in the snow.
- The same sled **MAY** be used for multiple age brackets, however it may only be considered for best design once, and each division requires individual entrance fee/donation.
- Your distance is measured when you are in/on sled, if you fall out that is where your distance ends (not where your sled ends up).
